or, COMPLETE SYSTEM + PC / Laptop
Capture Device - \$5050

Iris Camera

The EyeRonec Iris Camera has been specifically designed for taking ultra-clear iris photographs, for high resolution display on video monitors and projectors, and for printing full resolution photographs.

The EyeRonec Iris Camera uses a high megapixel CCD chip with a customised lens, lighting chamber and eye rest which directly captures and enhances the details of an iris while blocking out all ambient light.

Features include:

- * Auto Focus, simply hold up to eye and shoot
- * Instant Picture Display on monitor
- * Postcard size photograph in around 1 minute
- * Enlarge any area of interest on the screen up to 10 times
- * Built in Solid-state lighting system with extra lights for very dark irises, even true brown eyes!
- * Complete with sturdy camera case, all connectors and cables, software CD, 2 print cartridges and paper to print 40 photos
- * Can connect to video, DVD, projector or television
- * The L.C.D. Flat Panel Monitor can double as a computer monitor and TV.

15" LCD Flat Panel

Store images for patient files or import into any iris software program.

The EyeRonec Iris Camera is one of the best and easiest to use iris cameras on the market today!

Digital Photo Printer

- * FAST, simple and economical
- * Print high quality 4" x 6" photographs for your patients file
- * Single button control through camera
- * 3 year (extended) guarantee on all Canon products.
- * All consumables are available at camera and computer stores, and from EyeRonec.

**We have a range of EyeRonec configurations to suit your needs.
